OUR FAV TECHONLOGIES OF 2020

Over here, we're all about ensuring technologies we use to make our onboarding processes easier and hella efficient are also very user-friendly. Nobody likes waiting for a screen to load when they could be watching more episodes of the Office or ordering in Chiptole.

Listed below are our personal favorite technologies that have made our lives easier, but also have us look extra professional as if we're actually worth what we charge. Can we get an amen?!

Kartra | Kajabi | Dubsado | Canva

Keep in mind, this is our list of technologies that we believe can make your life as an online service provider easier. There are obviously way more technologies available for everyone uses. We'll include more in a part 2 when the time comes.
